

vizresume

how I made a visual resume
to learn everything I wanted to know about R

R-Ladies SF

Who Am I?

- a computational biologist studying how stem cells make neurons

The features that led to this project:

- a perpetual **project starter**
- a former school newspaper **layout editor**
- a postdoc fellow who has to **write progress reports** for funders
- a job-seeker who has spent too much time **writing a resume**

The Questions

The Questions

How do I remember what to put on my resume?

The Questions

How do I remember what to put on my resume?

Google spreadsheet

The Questions

How do I remember what to put on my resume?

Google spreadsheet

How do I prove (fully learn) the skills I list?

The Questions

How do I remember what to put on my resume?

Google spreadsheet

How do I prove (fully learn) the skills I list?

Teach a workshop, or do a project

The Questions

How do I remember what to put on my resume?

Google spreadsheet

How do I prove (fully learn) the skills I list?

Teach a workshop, or do a project

Where do I put my accomplishments that don't fit in 2 pages?

Google spreadsheet

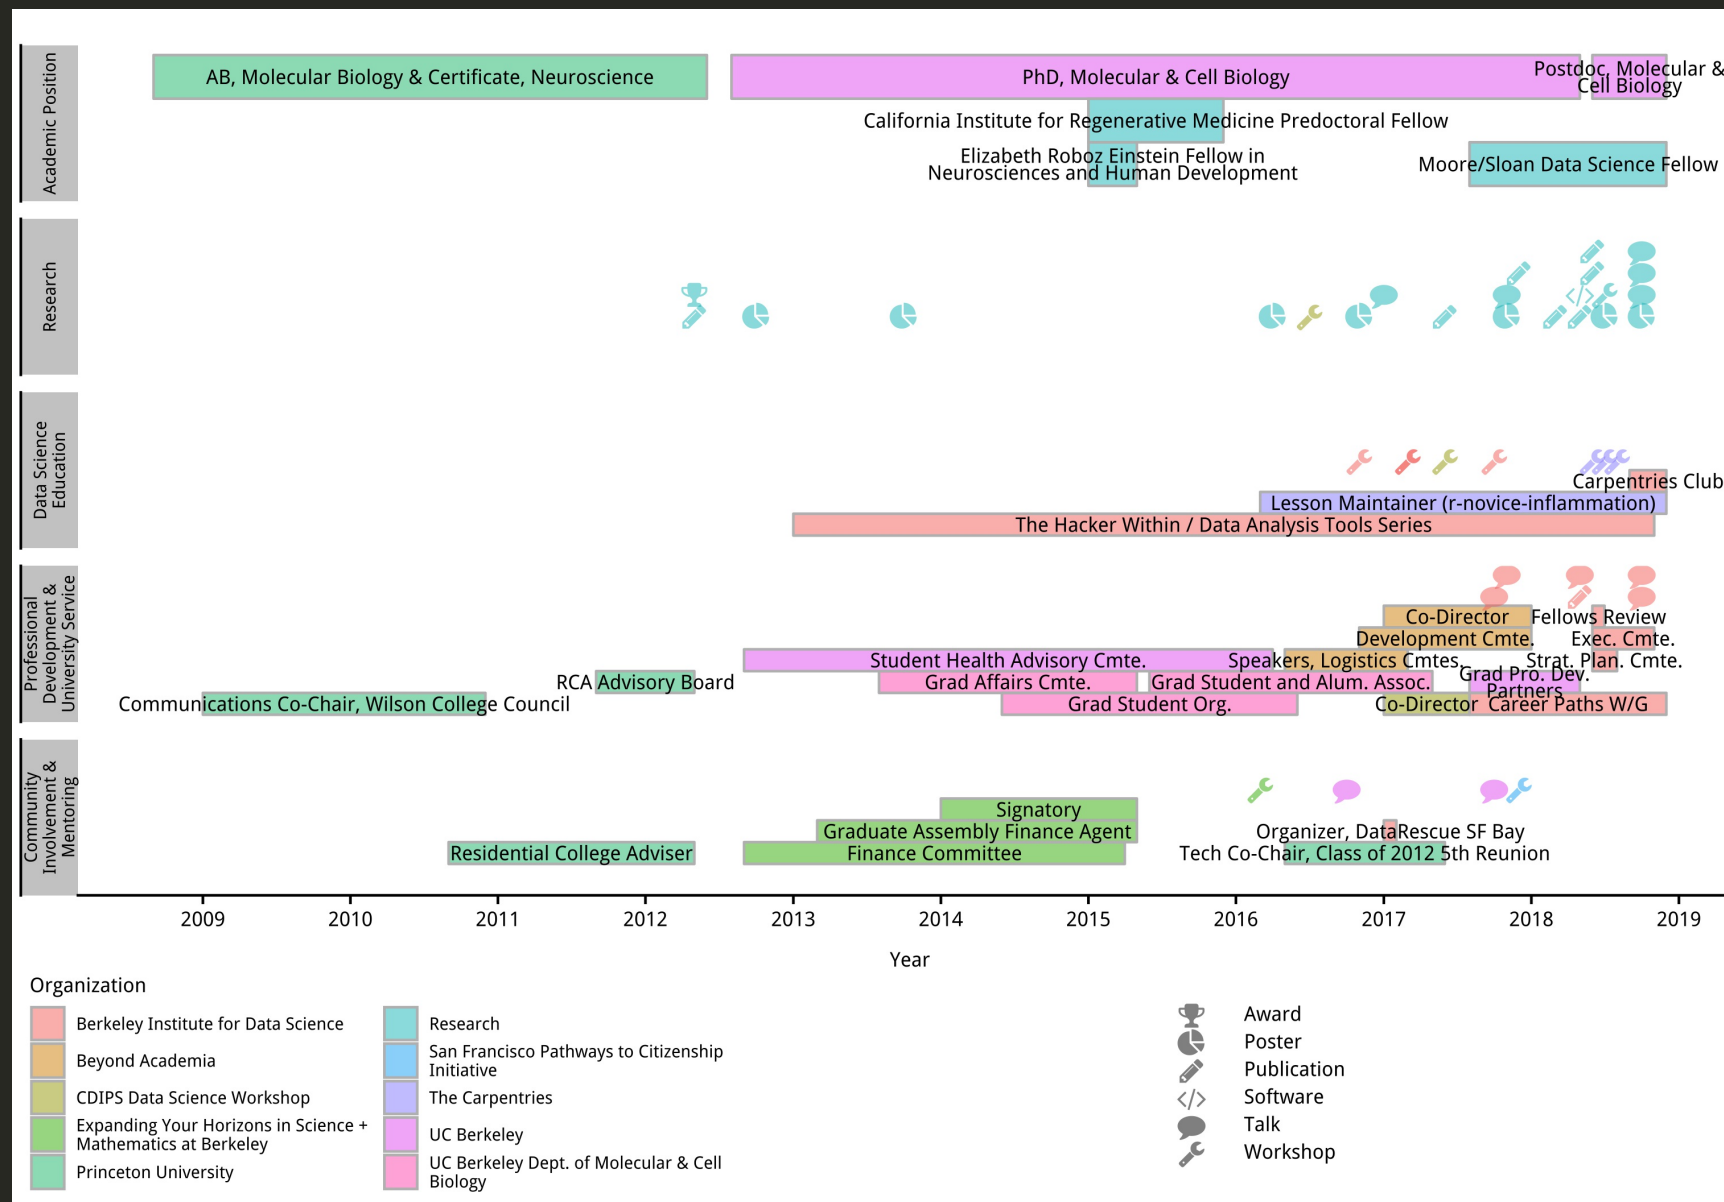

How do I prove (fully learn) the skills I list?

Teach a workshop, or do a project

Where do I put my accomplishments that don't fit in 2 pages?

It's time!

How It Works

Roll your own: github.com/diyadas/vizresume

What I Wanted to Learn

- Can **ggplot2** truly do it all? (and how to make it do as much as possible)

What I Wanted to Learn

- Can **ggplot2** truly do it all? (and how to make it do as much as possible)

What I Actually Learned

- Not everything can be reasonably automated, including my layout opinions.

What I Wanted to Learn

- Can **ggplot2** truly do it all? (and how to make it do as much as possible)

What I Actually Learned

- Not everything can be reasonably automated, including my layout opinions.
- There are more elegant ways, but my code works.

What I Wanted to Learn

- Can **ggplot2** truly do it all? (and how to make it do as much as possible)

What I Actually Learned

- Not everything can be reasonably automated, including my layout opinions.
- There are more elegant ways, but my code works.
- Everyone has already answered all my questions on StackOverflow but I didn't know my questions until I tried to build it.

What I Actually Learned

- Not everything can be reasonably automated, including my layout opinions.
- There are more elegant ways, but my code works.
- Everyone has already answered all my questions on StackOverflow but I didn't know my questions until I tried to build it.
- It is possible to learn **[xaringan]** in a few hours the day before a lightning talk.
